

79th ISUS Urban Infra Forum

Wednesday, 19th April, 2023, 7:00 pm KST

Speaker

Dr. Daeyeon Cho

(Chief director of future strategic division,
KAIA(Korea Agency for Infrastructure Technology Advancement))

Topic

Smart Cities in Korea

Summary

Since 2004, Korea has been pioneering the development of smart cities, and remains one of the most advanced countries in this field. Recently, Seoul was selected as the top smart city at the Smart City World Congress in Barcelona. The country is also promoting pilot smart cities in Sejong and Busan, led by the national government. Moreover, Korea is developing and disseminating data-based smart city models through national strategic research program. It is expected that various forms of smart city models, such as digital twins and autonomous vehicles, will continue to evolve in Korea. In this regard, I will provide a general introduction to these developments.
