

78th Urban Infra Forum

A Hierarchical Growth Management Strategy in Seattle

Seattle is one of the fastest growing tech cities in the US. In order to reduce sprawl and auto dependency, Seattle embraces growth pressure with a hierarchical growth management strategy. The strategy channels most of future growth to Urban Centers (6), Hub Urban Villages (6) and Residential Urban Villages (18). I will talk about the roles of these growth nodes and built environmental transformation to support transit use with enhanced walking and bicycling infrastructure.
